***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-3, drawn to a lysophosphatidic acid receptor.

- II. claims 4-8, drawn to a method for screening an agonist or an antagonist to the LPA receptor.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-II appears to be a lysophosphatidic acid receptor, p2y9. However, O'Dowd et al. (Gene 187:75-81, 1997) teach a GPCR, GPR23, which is p2y9 (see, e.g., Abstract; Fig. 1)

Therefore, the technical feature linking the inventions of Groups I-II does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

3. The special technical features in Groups I-II are a lysophosphatidic acid receptor p2y9 and a method for screening an agonist or an antagonist to the LPA receptor p2y9, respectively.

Art Unit: 1646

4. Accordingly, Groups I-II are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept. Thus, unity of invention is lacking and restriction is appropriate.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (I).
